MODEL TR2205 TRANSFER CASE

The TR2205 Transfer Case is designed for maximum application flexibility. The T-case is completely symmetrical with four identical Input/output stations. Each station has a 2.75 X 10 splined shaft which can be used as either an input or output.

Each station can also be fitted with an optional disconnect. These disconnects will accept companion flanges or yokes and can be used as axle disconnects or as PTO disconnects. An alternate line of disconnects is offered with integral SAE pump pads.

Depending upon disconnect selection, the TR2205 can be configured as a drop box, transfer case, pump drive or PTO.
