How to Read Transmission Serial Numbers

First Two Letters

LB = New

Second Two Digits

Year manufactured: For example, 99 = 1999; 00 = 2000; 01 = 2001

Last Digits

Number at Manufacture

Sample:

LB	00	011318
New	2000	Number at Manufacture

NOTE: The letters **LR** or **FLR** at the beginning of a serial number indicate a reman transmission.

Transmission Replacements

Remanufactured (REMAN) Transmissions

ZF Meritor offers remanufactured (REMAN) transmissions when you require a complete transmission replacement. REMAN transmissions come equipped in four basic configurations.

Call ArvinMeritor's Worldwide Aftermarket at 888-725-9355 to order a ZF Meritor REMAN transmission.

- Standard top cover with an oil pump
- Standard top cover without an oil pump
- Forward top cover with an oil pump
- Forward top cover without an oil pump

How to Determine the Correct REMAN Transmission Number

1. Record the transmission model printed on the identification plate. The identification plate is mounted to the transmission.
2. Remove the two sets of torque rating digits and the OEM specification number.

Example:

MO-16 G10C-E 18 002 → MO-G10C-E

3. Add the correct top cover designation to the end of the model number.
 - Add "S" for a standard top cover
 - Add "F" for a forward top cover
 - Add "X" for SureShift

Example: MO-G10C-ES

4. If the transmission has an oil pump, add "P" to the end of the model number.

Example: MO-G10C-ESP

5. Add "R" at the end of the model number to designate a REMAN transmission.

Example: MO-G10C-ESPR

Transmission Sealants

CAUTION

All transmissions use Loctite® MasterGasket™ Sealant #00203 or Loctite #5699 Ultra Gray Flange Sealant. Other gasket material can cause leaks. Damage to the transmission may result.
